February 2010

Rails Joint Project

The first phase of the refurbishment of the Rails Joints Project is now well under way and in some areas has been completed.

Those Bookmakers who bet from a Rails Joint are asked to treat the new equipment with care.

Some Bookmakers use their own equipment or 'mix and match' their equipment with that supplied as part of the Standard Rail Kit. In situations like this we ask that all of the kit remain on or under the joint you are operating from, please refrain from storing any part of the kit you are not using that day away from the joint as this can lead to loss or damage of the equipment.

I thank you in anticipation of your help and support in this initiative.

Robin Grossmith
